

**OMEMA EL-SHADDAL ENERGY
NIGERIA LIMITED**

INTEGRITY IN EVERY BARREL

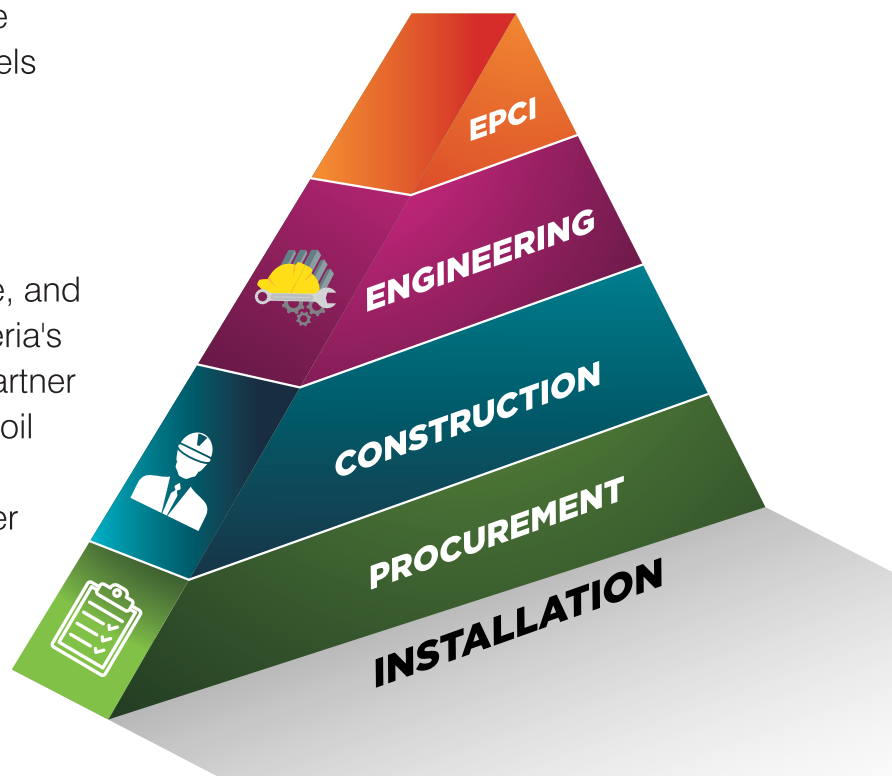

COMPANY PROFILE

About Us

OMEMA EL-SHADDAI ENERGY NIGERIA LIMITED is a technologically and excellent driven indigenous Nigerian offshore/onshore facilities engineering company. That specialized in providing EPCI services, marine safety/consultancy, offshore vessels supplying and training to various sectors.

Established to meet the growing demand for reliable, cost-effective, and technically sound services in Nigeria's energy sector, we are a trusted partner for major operators, independent oil companies, and multinational corporations operating in the Niger Delta and beyond.

Vision Statement

To be a trusted and leading energy and engineering solutions provider in Nigeria and beyond, recognized for excellence, safety, and sustainable impact.

Mission Statement

To provide safe, efficient, and innovative engineering and marine support services that exceed client expectations while maintaining the highest standards of sustainable environmental, social stewardship and corporate responsibility.

Our range of services are:

- » Onshore and Offshore Facilities Engineering, Construction and Installation
- » Swamp and shallow Offshore pipeline construction and installation

MARINE OPERATIONS & SUPPORT SERVICES

- » Procurement
- » Equipment lease
- » HSSE/marine safety Consultancy

SERVICE DESCRIPTION

ONSHORE AND OFFSHORE FACILITIES ENGINEERING, CONSTRUCTION AND INSTALLATION

Construction and Installation of Onshore/Offshore Oil and Gas Facilities The company undertakes the construction, installation, maintenance and upgrade of onshore/offshore oil and gas exploration and production facilities. With extensive experience in Nigeria's challenging operating environments, particularly the Niger Delta region, we deliver integrated Engineering, Procurement, Construction, and Installation (EPCI) services that enable our clients to develop and maintain world-class production infrastructure safely, efficiently, and cost-effectively.

Our Core Engineering Services: encompass the complete project lifecycle from conceptual design through detailed engineering to construction-ready documentation. We provide Front-End Engineering Design (FEED), process engineering, mechanical and piping design, structural engineering, electrical and instrumentation systems design, and civil engineering for oil and gas production facilities.

Construction Excellence: forms the backbone of our service delivery. For onshore facilities, we execute complete EPC packages including site preparation, civil works, structural steel erection, equipment installation, piping fabrication and installation, electrical and instrumentation works, and commissioning support.

Our construction capabilities extend to challenging swamp and shallow water environments where we deploy specialized equipment including swamp buggies and shallow-draft marine vessels. For offshore facilities, we provide platform construction, jacket installation, topsides integration, subsea tie-ins, and hook-up and commissioning services, working seamlessly with marine contractors to execute complex installations.

Installation Services: represent a critical differentiator for OMEMA EL-SHADDAI ENERGY. We manage heavy lift operations, modular unit installations, pipeline installation from trenching through testing, equipment setting and alignment, and complete system integration. Our installation crews are experienced in working within operational facilities under stringent safety protocols, minimizing production disruptions during brownfield modifications and tie-ins. This involves fabrication and installation of oil and gas structures which are sometimes fabricated in our fabrication workshops onshore and installed offshore making use of work-barges equipped with workshops and lifting equipment supported by other marine support vessels such as Supply vessels, Crew vessels and Emergency Response Vessels.

MARINE OPERATIONS & SUPPORT SERVICES

Barge Operations & Tugboat Services

We operate a modern fleet of barges & Tugboat suitable for various applications including equipment transportation, accommodation, towing and maneuvering, material supply, and workover operations in rivers, creeks, and coastal waters throughout the Niger Delta region. Our Barges & Tugboats are available for short-term and long-term charter arrangements.

Swamp Buggy Operations

For operations in shallow swamps and marshy terrain where conventional equipment cannot access, we deploy specialized swamp buggies.

Dredging Services

We provide dredging services for channel deepening, waterway maintenance, site preparation, and land reclamation. Our dredging equipment and experienced operators ensure projects are completed efficiently while adhering to environmental regulations and best practices.

Underwater Survey Services

ROV (Remotely Operated Vehicle) Services: We deploy work-class and observation-class ROVs for subsea inspection, survey, and light intervention work.

ROV services include:

- Pipeline route surveys and as-laid surveys
- Platform and subsea structure inspections
- Cathodic protection surveys
- Debris clearance and pre-lay surveys
- Video documentation and still photography

PROCUREMENT

OMEMA EL-SHADDAI operates a robust procurement function that manages the sourcing, evaluation, and delivery of materials, equipment, and services for energy projects. Our procurement team maintains relationships with certified international and local suppliers, ensuring competitive pricing, quality assurance, and timely delivery. We handle everything from specialized equipment to consumables, providing complete supply chain solutions.

Equipment Supply And Operation

All our equipment is available for hire both short term and long term. We supply a wide range of construction and specialized equipment including:

Heavy Lifting Equipment:

- Mobile cranes
- Crawler cranes for heavy lifts
- Forklifts and telehandlers
- Chain blocks and hoists

Earth Moving Equipment:

- Excavators (20 to 45-ton class)
- Bulldozers and wheel loaders
- Motor graders and compactors
- Backhoes and trenchers

4.3 Specialized Equipment:

- Swamp buggies for marsh operations
- Pipeline welding equipment and machines
- Hydrostatic test pumps and intelligent pigs
- Generators (20 KVA to 500 KVA)
- Air compressors and water pumps

4.4 Marine Equipment:

- Barges (flat-top and spud barges)
- Tugboats
- Crew boats and work boats
- Mooring equipment and anchors

Equipment Operation Services

Beyond equipment supply, we provide fully operated equipment packages including:

- Certified operators and maintenance technicians
- Field maintenance and repair services
- Equipment transportation and mobilization
- On-site supervision and coordination

HEALTH, SAFETY, SECURITY & ENVIRONMENT (HSSE) CONSULTANCY

Safety is paramount in all our operations.

Our HSSE consultancy division provides comprehensive services including:

- Safety Management Systems development and implementation
- Risk assessment and hazard identification studies
- Environmental Impact Assessments (EIA)
- Emergency Response Planning and training
- Safety audits and compliance reviews
- Incident investigation and analysis
- Safety training and competency development programs
- Environmental monitoring and reporting
- Waste management solutions.

We help clients establish and maintain robust safety cultures that protect personnel, assets, and the environment while ensuring regulatory compliance with Nigerian and international standards including DPR, NESDEC, ISO 45001, and ISO 14001.

Marine Consultancy Services

Our marine consultancy division provides specialist advice and technical support for offshore projects:

Marine Asset Management:

Vessel inspection programs, maintenance planning, and fleet optimization

Marine Emergency Response:

Oil spill response planning, salvage planning, and crisis management
Marine transport management and planning.

Why Choose US?

» **Operational Efficiency and Cost Leadership:** Our international content focus and operational efficiency deliver competitive pricing without compromising quality or safety standards.

» **Innovation and Technology:** Continuous innovation in products, services, and processes by adopting cutting-edge technologies.

» **Commitment to Sustainability and Renewables:** environment-conscious energy service provider, coupled with clear decarbonization strategies, thereby meeting all regulatory demands.

» **Strong Brand and Reputation:** we a strong, trusted brand built on consistent quality, reliability, and positive customer experience.

» **Strategic Flexibility and Adaptability:** we adapt quickly to changing work-scope and government regulations.

» **Expertise:** We have a team of professionals with world class training, multi-skilled and certified personnel who have extensive knowledge in our services.

» **Safety:** Safety is paramount in all our operations. Our HSSE consultancy division provides comprehensive services.

» **Equipment:** we maintain a comprehensive equipment inventory and operates a professional equipment management division ensuring reliable, well-maintained assets for client projects.

» **Regulatory compliance:** We operates in full compliance with Nigerian regulatory requirements and international industry standards.

CEO

ENGR. ALAO SYLVANUS OMONIYI

(COREEN, NSE, NEBOSH)

Highly accomplished Marine Safety & Operations Professional with over 30 years of progressive experience in maritime operations, oil & gas, industrial manufacturing, and large-scale infrastructure environments.

Proven leader in HSE management, marine journey management, environmental compliance, recognized for building and strengthening robust safety management systems, driving regulatory compliance (Iso 9001/2015, Iso 14001/2015, Iso 45001/2015, ISM Code, DPA, MNISP, MNSE, and delivering measurable improvements in safety performance, and safety assurance (OSHA, IOSH, NEBOSH) with an exceptional track record supporting blue-chip organizations including Shell, Total, Chevron, Saipem, and Strides Energy.

Brings strong leadership, analytical thinking, and communication skills, coupled with a proactive, solution-oriented approach that consistently enhances operational efficiency, workforce safety, and environmental stewardship.

**OKAULA
AUGUSTINE
EZEKIEL
COO**

Operations Manager | NDT Expert |
Oil & Gas Professional

Dynamic and results-driven Operations Manager with over 8 years of experience in contract execution within the oil & gas and energy services sector. A graduate of Electronics Technology from the University of Port Harcourt, bringing extensive expertise in Non-Destructive Testing (NDT), project management, business development, contract management, and operational excellence. Prior to joining OMEMA EL-SHADDAI ENERGY NIGERIA LIMITED, served as Executive Manager at Exquisite Integrated Services Limited, where I oversaw contract execution and developed strategic business execution frameworks.

Currently functions as Operations Manager at OMEMA EL-SHADDAI ENERGY, leading integrated service delivery across engineering, marine support, and HSSE operations. Recognized for optimizing operational workflows, leading multidisciplinary teams, ensuring regulatory compliance, and driving sustainable business growth. Combines strong technical proficiency in NDT methodologies with strategic leadership to deliver high-impact results in complex and demanding environments.

**ENGR. UDUIMOH
AGBOKHAUDE
PAUL
AGM**

Results-driven Senior Civil/Structural Design Engineer with over 15 years of progressive experience delivering complex onshore and offshore oil & gas, pipeline, FPSO, and industrial infrastructure projects across Nigeria. Proven track record supporting major operators and EPC contractors including Shell, TotalEnergies, NNPC, Chevron, Saipem, Agip, Mobil, and Aiteo, from concept and basic engineering through detailed design, fabrication, construction, and site execution.

Recognized for strong technical leadership, design optimization & constructability, structural & civil engineering excellence, standards & compliance (e.g., BS 5950), analytical & problem-solving skill, and constructability-driven solutions, with deep expertise in structural steel and reinforced concrete design, pipe racks, platforms, shelters, foundations, and pipeline facilities.

Adept at managing multidisciplinary interfaces, producing high-quality engineering deliverables, and resolving complex site and fabrication challenges under tight schedules.

OUR REGISTRATIONS

CONCLUSION

OMEMA EL-SHADDAL ENERGY NIGERIA LIMITED represents a new generation of Nigerian energy service companies combining local knowledge, international standards, and comprehensive capabilities. Our integrated approach to engineering, marine operations, and safety consultancy provides clients with a single-source solution for their most demanding projects.

With a track record of successful project delivery, an unwavering commitment to safety, and a vision for sustainable growth, we are positioned as the partner of choice for companies seeking reliable, efficient, and innovative energy services in Nigeria and beyond.
